PKCS #15 v1.1 Technical Corrigendum 1

RSA Laboratories

October 24, 2000

Table of Contents

1. INTRODUCTION 1

2. CHANGES TO SECTION 5, "IC CARD FILE FORMAT" 1

2.1 CHANGES TO SECTION 5.4.1, "EF(DIR)" 1

3. CHANGES TO SECTION 6, "INFORMATION SYNTAX IN ASN.1" 1

3.1 CHANGES TO SECTION 6.1.5, "REFERENCEDVALUE AND PATH" 1

4. CHANGES TO ANNEX A, "ASN.1 MODULE" 2

A. INTELLECTUAL PROPERTY CONSIDERATIONS 3

B. REFERENCES 3

C. ABOUT PKCS 3

1. Introduction

This corrigendum lists known errors in version 1.1 of PKCS #15 [1], and should be incorporated into that version.

2. Changes to Section 5, "IC card file format"

2.1 Changes to Section 5.4.1, "EF(DIR)"

[*Remove the last sentence starting*: "An example of EF(DIR) contents…"]

3. Changes to Section 6, "Information syntax in ASN.1"

3.1 Changes to Section 6.1.5, "ReferencedValue and Path"

C. About PKCS

The *Public-Key Cryptography Standards* are specifications produced by RSA Laboratories in cooperation with secure systems developers worldwide for the purpose of accelerating the deployment of public-key cryptography. First published in 1991 as a result of meetings with a small group of early adopters of public-key technology, the PKCS documents have become widely referenced and implemented. Contributions from the PKCS series have become part of many formal and *de facto* standards, including ANSI X9 documents, PKIX, SET, S/MIME, and SSL.

Further development of PKCS occurs through mailing list discussions and occasional workshops, and suggestions for improvement are welcome. For more information, contact:
