TITLE: Negative vote of the US National Body on DIS 8802-11 on Wireless LANs

SOURCE: US National Body

PROJECT: 1.06.41.11

REFERENCES: ISO/IEC DIS 8802-11, Telecommunications and Information Exchange Between Systems - LAN/MAN Specific Requirements - Part 11: Wireless Medium Access Control (MAC) method and physical layer specifications

STATUS: Draft for approval by IEEE 802 SEC

The US National Body received comments on the Management Information Base (MIB) as defined in the DIS and came to the conclusion that the document needs to be revised before it could be approved as an International Standard.

However, the instructions for change have to be generated and approved by the appropriate groups. The final result is expected to be ready by the meeting of the IEEE P802 group in March 1998 and will be forwarded as soon as ready.
