VSG-1200 V1.00 Release Note:

===
VSG-1200 V1.01.03:

Fixed Bugs:
 1. When backuping account list to txt file, it will have mass data when
account's billing profile
     index is "none".

===
VSG-1200 V1.01.02:

Fixed Bugs:
 1. Create static account in scenario A and C, it should send the account create
sysylog but the
     format is wrong.
 2. set up the authentication mode as agreement, when client login the system,
the page's url is
     "http:///".

===
VSG-1200 V1.01.01:

Fixed Bugs:
 1. The account will still remain on the current user list.

New Modifications:
 1. User agreement page sample code follows SSL enable/disable.
 2. Portal page can be used when "No Authentication" selected.
 3. Scenario A/C static account keeps "NONE" type. These type of accounts will
not be charged.
     "System is Error" error message will not show up. Usage time will count up.
These "none"
     type of accounts equal with "super subscriber"
 4. Scenario C add "static" type in the billing log
 5. Copyright on the Console/Web UI is different: "2002-2003" or "2000-2003"
     Now it is "2003"
 6. Administrator login page shows Firmware Version as attached UI
